

**DR.M.G.R EDUCATIONAL & RESEARCH INSTITUTE UNIVERSITY
DEPARTMENT OF DENTAL ANATOMY, EMBRYOLOGY AND ORAL HISTOLOGY**

Subject Code:	Subject Name : Dental Anatomy, Embryology And Oral Histology	T / L/ ETL	L	T / S.Lr	P/ R							
	Prerequisite:	T										
L : Lecture T : Tutorial SLr : Supervised Learning P : Project R : Research C: Credits T/L/ETL : Theory/Lab/Embedded Theory and Lab.												
SKILLS: 1. Carving of crowns of permanent teeth in wax. 2. Microscopic study of Oral tissues. 3. Identification of Deciduous & Permanent teeth. 4. Age estimation by patterns of teeth eruption from plaster casts of different age groups.												
COURSE OUTCOMES (COs) : (3- 5)												
CO1	To appreciate the normal development, morphology, structure & functions of oral tissues & variations in different pathological/non-pathological states.											
CO2	To understand the histological basis of various dental treatment procedures and physiologic ageing process in the dental tissues.											
CO3	To understand the knowledge of the normal structure and functions of the body, the alterations which take place in disease with particular reference to those conditions in which medical and dental co-operation essential for proper management.											
CO4	To acquire the background knowledge of interpersonal, managerial and problem solving skills which are an integral part of modern dental practice.											
CO5	To understand the various histological techniques, procedures of oral and para-oral tissues processing method.											
Mapping of Course Outcomes with Program Outcomes (POs)												
Cos/Pos	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	H	H	L	L	L	L	M	L	M	L	M	M

DR.M.G.R EDUCATIONAL & RESEARCH INSTITUTE UNIVERSITY

DEPARTMENT OF DENTAL ANATOMY, EMBRYOLOGY AND ORAL HISTOLOGY

UNIT1-Introduction to tooth morphology: Human dentition, types of teeth, & functions, Palmer's & Binomial notation systems, tooth surfaces, their junctions - line angles & point angles, definition of terms used in dental morphology, geometric concepts in tooth morphology, contact areas & embrasures - Clinical significance-Morphology of permanent teeth-Description of individual teeth, along with their endodontic anatomy & including a note on their-chronology of development, differences between similar class of teeth & identification of individual teeth-Variations & Anomalies commonly seen in individual teeth-Morphology of Deciduous teeth-Generalized differences between Deciduous & Permanent teeth-Description of individual deciduous teeth, including their chronology of development, endodontic anatomy, differences between similar class of teeth & identification of individual teeth-Occlusion-Definition, factors influencing occlusion - basal bone, arch, individual teeth, external & internal-forces & sequence of eruption-Inclination of individual teeth - compensatory curves-Centric relation & Centric occlusion - protrusive, retrusive & lateral occlusion-Clinical significance of normal occlusion-Introduction to & Classification of Malocclusion.

UNIT2-Oral Embryology-Brief review of development of face, jaws, lip, palate & tongue, with applied aspects-Development of teeth- Epithelial mesenchymal interaction, detailed study of different stages of development of crown, root-supporting tissues of tooth & detailed study of formation of calcified tissues- Applied aspects of disorders in development of teeth-Eruption of deciduous & Permanent teeth-Mechanisms in tooth eruption, different theories & histology of eruption, formation of dentogingival-junction, role of gubernacular cord in eruption of permanent teeth-Clinical or Applied aspects of disorders of eruption-Shedding of teeth-Factors & mechanisms of shedding of deciduous teeth-Complications of shedding.

UNIT3:Oral Histology-Detailed microscopic study of Enamel, Dentine, Cementum & Pulp tissue. Age changes & Applied-aspects (Clinical and forensic significance) of histological considerations - Fluoride applications,-transparent dentine, dentine hypersensitivity, reaction of pulp tissue to varying insults to exposed-dentine ; Pulp calcifications & Hypercementosis-Detailed microscopic study of Periodontal ligament & alveolar bone, age changes, histological changes in periodontal ligament & bone in normal & orthodontic tooth movement, applied aspects of alveolar bone resorption-Detailed microscopic study of Oral Mucosa, variation in structure in relation to functional requirements, mechanisms of keratinization, clinical parts of gingiva, Dentogingival -Mucocutaneous junctions & lingual papillae. Age changes & clinical considerations-Salivary Glands-Detailed microscopic study of acini & ductal system-Age changes & clinical consideration-TM Joint- Review of basic anatomical aspects & microscopic study & clinical consideration Maxillary Sinus-Microscopic study, anatomical variations, functions & clinical relevance of maxillary sinus in dental practice-Processing of Hard & soft tissues for microscopic study-Ground sections, decalcified sections & routine staining procedures-Basic histochemical staining patterns of oral tissues.

UNIT4.Oral Physiology-Saliva -Composition of saliva - variations, formation of saliva & mechanisms of secretion, salivary reflexes,brief review of secretomotor pathway, functions, role of saliva in dental caries & applied aspects of hyper & hypo salivation- Mastication -Masticatory force & its measurement - need for mastication, peculiarities of masticatory muscles,masticatory cycle, masticatory reflexes & neural control of mastication-Deglutition -Review of the steps in deglutition, swallowing in infants, neural control of deglutition & dysphagia-Calcium, Phosphorous & fluoride metabolism -Source, requirements, absorption, distribution, functions & excretion, clinical considerations, hypo & hypercalcemia & hyper & hypo phosphatemia & fluorosis-Theories of Mineralization : Definition, mechanisms, theories & their drawbacks-Applied aspects of physiology of mineralization, pathological considerations - calculus formation-Physiology of Taste : Innervation of taste buds & taste pathway, physiologic basis of taste sensation, age changes & applied aspects - taste disorders-Physiology of Speech : Review of basic anatomy of larynx

& vocal cords- Voice production, resonators, production of vowels & different consonants - Role of palate, teeth & Tongue-Effects of dental prosthesis & appliances on speech & basic speech disorders.

TOTAL NUMBER OF HOURS: LECTURE-105,PRACTICAL-250

RECOMMENDED BOOKS:

1. Orban's Oral Histology & Embryology - S.N.Bhaskar
2. Oral Development & Histology - James & Avery
3. Wheeler's Dental Anatomy, Physiology & Occlusion - Major.M.Ash
4. Dental Anatomy - its relevance to dentistry - Woelfel & Scheid
5. Applied Physiology of the mouth - Lavelle
6. Physiology & Biochemistry of the mouth – Jenkins

Revised B.D.S regulation 2007 approved by dental council of India
